I am a 3D artist and junior visual designer with experience in character sculpting, digital content production, and creative project development. I have worked on models for video games, 3D printing, and interactive experiences, as well as creating content for social media and university communications. I am known for my ability to adapt to different styles, my attention to detail, and my skill at transforming ideas into functional and visually appealing results.

EDUCATION

- **Animation and Digital Content Design Engineering** | Pablo Guardado Chávez University | 2022–2026

PROFESSIONAL EXPERIENCE

3D Character Sculpting and Modeling – Pablo Guardado Chávez University and Independent Projects

Remote, Tuxtla Gutierrez, Chiapas

2024 — 2026

- I developed about ten human characters, creatures, and stylized models using digital sculpting in ZBrush.
- I prepared models for 3D printing by slicing and assembling them, making them easier to manufacture and assemble.
- I optimized characters for video games using retopology, UV mapping, and polygon reduction in Maya.
- I created costumes and textures using Marvelous Designer and Substance 3D Painter.

Visual Content Design – General Directorate of Teaching and School Services, Benemérita Autonomous University of Chiapas

Hybrid, Tuxtla Gutierrez, Chiapas

August 2025 — April 2026

- I designed more than 300 posts for Facebook and Instagram using Canva, maintaining a production rate of two to three posts per day.
- I produced videos and informational materials in CapCut for announcements, special events, and university activities.
- I created AI-generated visual content to better represent the Mexican audience in a more relatable and contextualized way.
- I helped increase reach and engagement; several pieces were shared on the university's official pages.

Visual Design and 3D Production Support – Ch'ulel, University Project

Tuxtla Gutierrez, Chiapas

2024 — 2026

- I developed the marketing manual, the initial logo concept, and visual materials to present the project.
- I designed publications, stories, and presentations in collaboration with a multidisciplinary team.
- I modeled props and small 3D scenes to complement the project's visual atmosphere.
